## CAREMED

Community-based Approach for Resilient Mediterranean Health

CAREMED strengthens the resilience of chronic care from capital-centred management, early detection, prevention, and management, to foster collaboration among health professionals in the Mediterranean region. Its goal is to build a more equitable, resilient, and sustainable healthcare system.

# CAREMED

Community-based Approach for Resilient Mediterranean Health

CAREMED strengthens the resilience of Mediterranean health systems by shifting chronic care from hospital-centred to community-based approaches. It improves prevention, early detection, patient engagement, and chronic disease management, while fostering collaboration among health stakeholders across the Mediterranean to improve chronic care policies. Its goal is to build a more equitable, resilient, and sustainable Mediterranean healthcare system.

 Community-based Approach for Resilient Mediterranean Health

CAREMED integrates the expertise of Mediterranean health systems by sharing models and best practices of organizational approaches in resource management, while fostering collaborative primary health institutions across the Mediterranean to improve disease care delivery. The main objective is to build a more equitable, resilient, and sustainable Mediterranean healthcare system.
