

A NEW ERA IN SURGICAL EDUCATION

Where **medical expertise**,
academic excellence and **advanced
technology** come together to shape
the future of surgery.

Introducing the

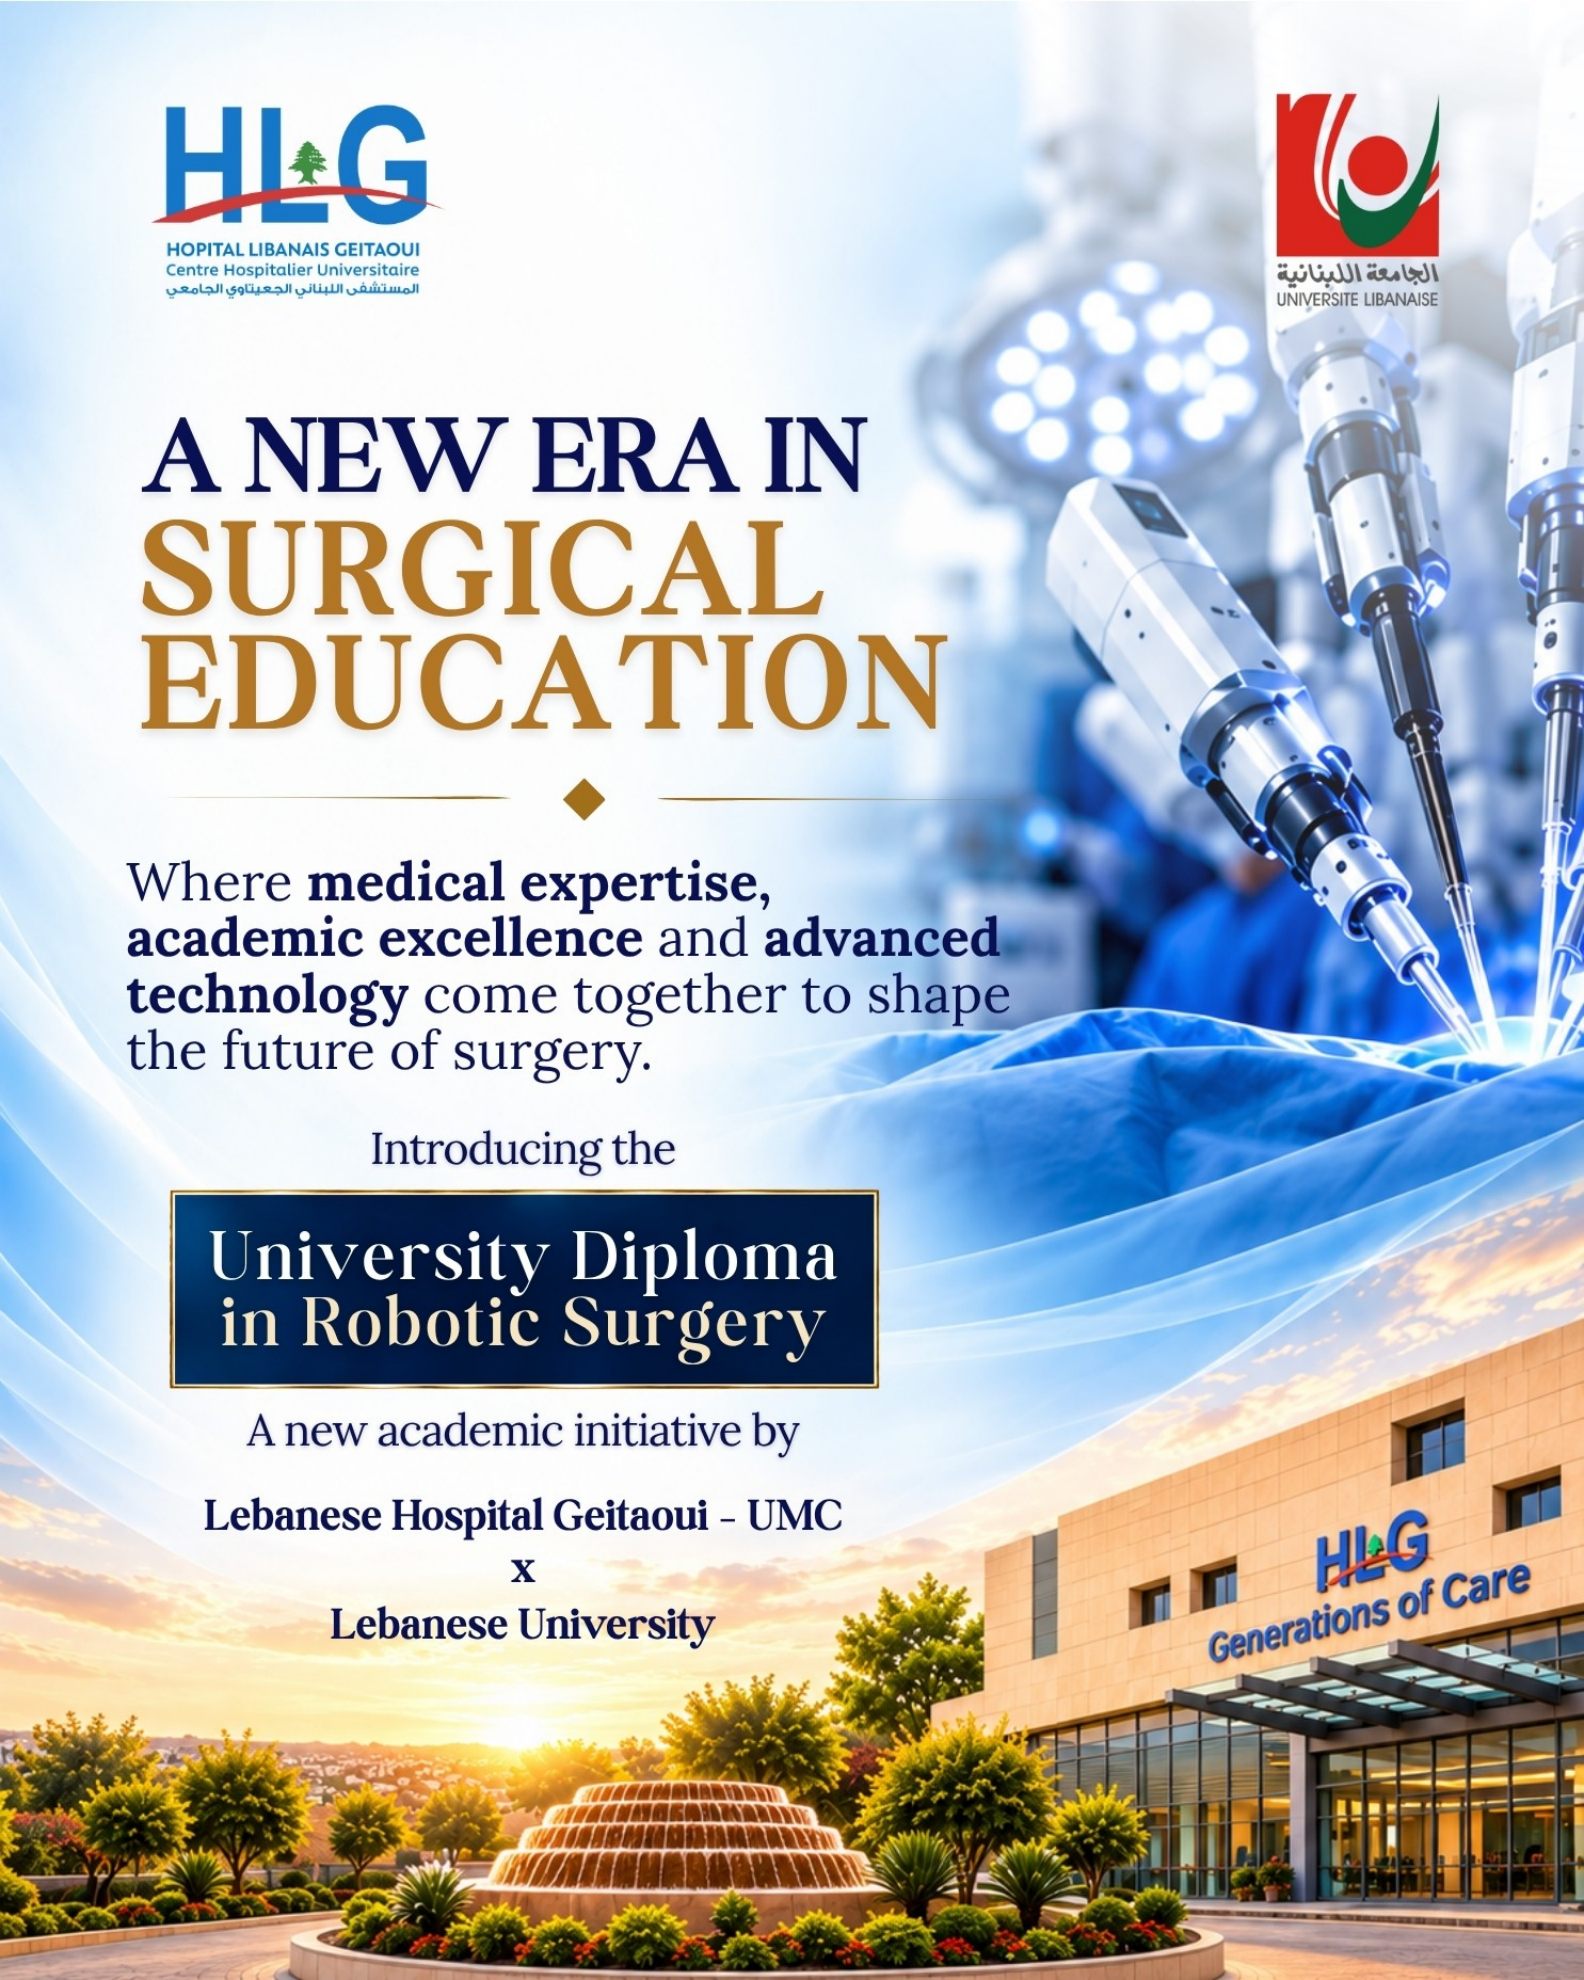

University Diploma in Robotic Surgery

A new academic initiative by

Lebanese Hospital Geitaoui - UMC

X

Lebanese University

WHAT IS THE UNIVERSITY DIPLOMA IN ROBOTIC SURGERY?

An academic program developed
through the collaboration of:

**Lebanese Hospital
Geitaoui – UMC**
Clinical Expertise
& Robotic Surgery

**Lebanese University
Faculty of Medical
Sciences**
Academic Excellence
& Medical Education

**ACADEMIC
EXCELLENCE**

**CLINICAL
EXPERTISE**

**ADVANCED
TECHNOLOGY**

THE OBJECTIVES

The University Diploma in Robotic Surgery aims to:

Build a strong foundation in the **principles of robotic surgery**

Develop understanding of robotic **surgical systems and technologies**

Strengthen knowledge of patient selection, preparation **and safety**

Introduce the principles of **robot-assisted surgical techniques**

Develop familiarity with robotic **operating-room workflows**

Promote structured, evidence-based robotic surgery education

Training the Surgeons of Today, Preparing the Surgeons of Tomorrow

Preparing physicians for the
evolving landscape of modern
surgery through **education,**
technology and clinical **expertise.**
